

Food groups and digestion

A company makes a sandwich called 'the Healthy delight'. It is made from bread, butter, celery and ham. Use the food triangle below to answer the questions.

Questions

- ① Do you think the 'Healthy Delight' is healthy? Explain why you think this
- ② 'Stringy' vegetables like celery contain a lot of fibre. Fibre is not digested but the body. List, in order, the organs the fibre passes through when it has been eaten.
- ③ The table below shows the names of some enzymes, where they are found and what they do. Using the table below, explain where you think most digestion happens.

Enzyme	Where it's found	What breaks down
Amylase	Salivary gland	Starch
Lipase	Small intestine	Fat
Pancreatic amylase	Small intestine	Starch
Pepsin	Stomach	Protein
Trypsin	Small intestine	Protein
